## Tips in Financial Stability for the Millennial

Local Financial Advisor Christopher J. Dixon is a Managing Partner and Founding Member for Oxford Advisory Group, a financial advisory company focusing on retirement planning. With two offices, one in Orlando and one here in Greenville, Christopher understands the power of the Hispanic market and why it's important to reach out to them directly.

Christopher, whose grandfather is Spanish-Cuban, has two financial advisers on staff who are Mexican and fluent in Spanish. He admits the industry is primarily male and white, and he wants to be pivotal in changing that in Greenville. In regards to his Hispanic advisers, he states, "I believed in them when no one else would give them a chance. With proper training it doesn't matter what skin tone you are. What matters is passion and how you take care of your family and community."

**Christopher and his advisers gave InSouth Magazine these 3 tips to help millennials and immigrants correct or establish credit:**

- Purchase a secured credit card through your bank or credit union. If used regularly, and paid strategically, you can see almost immediate results.
- Be sure that your credit report is accurate. Use a financial planner at Oxford Advisory Group to confirm that your report and score is factual. 1 in 5 reports have mistakes in them!
- DO NOT apply for credit cards at retail stores! The more you apply, the more your credit takes a hit. Only apply for true credit cards or secured cards through your bank.
